1. Executive Summary

The FDE Admission Portal 2026 is a secure, web-based digital platform developed by the Federal Directorate of Education (FDE) to modernise and automate the annual school admission process across all 432 FDE-managed institutions in Islamabad Capital Territory.

The portal eliminates paper-based admission reporting, provides real-time visibility to FDE administrators, AEOs, and the Director General, and enforces institutional capacity limits — all while giving each Head of Institution (HoI) a simple, guided data-entry interface.

Key Benefits

- Real-time admission data from all 432 schools — no more monthly Excel reports
- Automatic capacity enforcement prevents over-enrollment in any class
- Full audit trail for every correction, override, and approval
- Role-based access: each user sees exactly what they are authorised to see
- Referral and transfer workflows reduce administrative paperwork
- AI-powered analytics help identify trends and anomalies across sectors
- One-click installer for rapid deployment on live servers

Technology Stack

Layer	Technology
Frontend Framework	Tailwind CSS + Alpine.js (Vite bundler)
Backend Framework	Laravel 12 (PHP 8.2)
Database	MySQL 8.0 (33+ tables, 48 migrations)
Authentication & RBAC	Spatie Laravel-Permission v7 (106 permissions)
PDF Export	Barryvdh DomPDF
Excel Export	Maatwebsite Excel
AI Report Studio	Anthropic Claude API
Email Notifications	Laravel Mail (SMTP configurable)
Server (Linux)	Nginx + PHP 8.2-FPM
Deployment	One-click installer (install.sh / install.bat)

2. User Roles & Access Levels

The portal uses a strict Role-Based Access Control system with 4 roles and 106 individual permissions. Each user sees only the data and actions permitted by their role.

Role	Who Uses It	Data Scope	Enter Data	Override	Reports
Head of Institution (HoI)	School principals & heads	Own school only	✓ Yes	✗ No	Own school
Area Education Officer (AEO)	Sector supervisors	Assigned sector only	✗ Read-only	✗ No	Sector-scoped
FDE Cell	Portal administrators	All 432 schools	✓ Yes	✓ Full	System-wide
Director	DG / Secretary	All 432 schools	✗ Read-only	✗ No	System-wide

Permission Summary

Role	Total Permissions	Key Capabilities
Hol	22	Profile, Classes, Enrollment, Daily Admissions, Transfers, Referrals, Monitoring
AEO	9	View sector dashboard, reports, monitoring (read-only)
FDE Cell	44	All Hol permissions + overrides, corrections, grants, referrals, audit, admin
Director	9	View all dashboards, reports, monitoring (read-only, executive view)

3. System Modules

The portal comprises 25 functional modules organised into 5 groups: Core Data Entry, Workflow & Approvals, Reporting & Analytics, Administration, and Public Access.

Group A — Core Data Entry & School Setup (Modules 1–6)

Module 1 — Authentication & Session Management

Purpose	Secure user login, session management, and password recovery
Login	Email + password with throttle protection (max 5 attempts/minute)
Dashboard	Automatic role-based redirect — each role lands on their own dashboard
Security	Encrypted sessions, CSRF protection, audit log on every login/logout
Recovery	Password reset via email with time-limited token
Who Uses	All users (Hol, AEO, FDE Cell, Director)

Module 2 — School Profile Setup

Purpose	One-time configuration linking a Hol account to their school
Process	Hol selects Union Council → Sector → School from drop-downs
Configures	School gender type (Boys / Girls / Mixed) and shift (Morning / Evening / Both)
Editable By	FDE Cell can override any school's profile at any time
Status	Institution marked as 'profile set' after first save
Who Uses	Hol (initial setup), FDE Cell (corrections)

Module 3 — Class & Section Configuration

Purpose	Hol activates the classes taught at their school and names the sections
Classes	Nursery, Prep, Class I through Class XII (including ECE and Matric Tech)
Sections	Up to 26 sections per class (A, B, C...) with capacity per section
Seats	Total authorized seats entered per class; enforced during admissions
Prerequisite	Must be completed before enrollment and daily admission entry
Who Uses	Hol (configure), FDE Cell (override via Seat Configuration module)

Module 4 — Seat Configuration (FDE)

Purpose	FDE sets the official authorized seat capacity per class per school
Lock	Seats can be locked once finalized for the academic year
Enforcement	System blocks admission entry if total admitted would exceed seats
Override	FDE Cell can unlock and edit seats if needed; all changes audited
Who Uses	FDE Cell (configure and lock)

Module 5 — Enrollment — Baseline Data

Purpose	Hol enters the baseline enrollment count from the previous academic year
Fields	Promoted count + Failed count per class; system auto-calculates existing enrollment
Lock	Enrollment locks once submitted; FDE Cell can unlock and override
Importance	Enrollment baseline is used to calculate available seats for new admissions
Who Uses	Hol (submit), FDE Cell (override via Enrollment Override module)

Module 6 — Daily Admission Entry — Core Feature

Purpose	Hol enters actual admissions received each day, class by class
Shifts	Morning Boys, Morning Girls, Evening Boys, Evening Girls (per class)
OOSC	Out-of-School Children tracked separately (boys/girls per shift)
P2P	Parho Pakistan students tracked separately (boys/girls per shift)
Matric Tech	Extra count for Classes 9 & 10 where applicable
Seat Check	Real-time check: cannot exceed authorized seats (hard block)
Cutoff	Daily submission deadline (configurable, default 11:59 PM PKT)
Late Entry	After cutoff, FDE must issue an Edit Grant for the school to re-enter
Auto-Verify	On submit, system verifies immediately OR marks for FDE review
Who Uses	Hol (enter and submit), FDE Cell (override / return to Hol)

Group B — Workflow & Approval Modules (Modules 7–11)

Module 7 — Admission Monitoring Workflow

Purpose	4-stage tracking card for every verified admission — test to document
Stage 1	Test Verification: pass / fail / exempted (updated by Hol or FDE)
Stage 2	Merit Confirmation: accepted / rejected (updated by FDE Cell)
Stage 3	Document Verification: provisional / affidavit case / complete (Hol + FDE)
Stage 4	Finalized: all stages complete, record closed
Audit	Every status change recorded: who changed it, when, and why
Override	FDE Cell can override any stage with a mandatory reason
Who Uses	Hol (test + doc stages), FDE Cell (all stages + override), AEO & Director (view)

Module 8 — Student Transfers

Purpose	Formal school-to-school student transfer with enrollment adjustment
Initiation	Hol initiates from own school; selects class + destination school
Response	Receiving Hol can accept, reject (with reason), or request more information
Effect	Accepted transfer: automatically adjusts enrollment at both schools
Cross-Sector	Transfers across sector boundaries require FDE Cell approval first
Who Uses	Hol (initiate / respond), FDE Cell (cross-sector approval)

Module 9 — Referral System

Purpose	FDE places a specific student at a specific school for special admission
Creation	FDE Cell creates referral: school, class, gender, shift, student details
Reference	Unique reference number auto-generated per referral
Hol Action	Hol accepts (auto-creates daily admission) or rejects with mandatory reason
Tracking	Test result + final admission decision tracked in referral record
Re-Refer	If rejected, FDE can re-refer the same student to a different school
Who Uses	FDE Cell (create/manage), Hol (accept / reject / update result)

Module 10 — Admission Corrections

Purpose	Formal process for Hol to request a change to a past verified record
Snapshot	Old values captured automatically; Hol provides new values + reason
Approval	FDE Cell reviews: approves (record updated) or rejects (with reason)
Audit	Full before/after record saved in audit log regardless of outcome
Who Uses	Hol (request), FDE Cell (approve / reject)

Module 11 — Admission Edit Grants (Option B)

Purpose	Allows Hol to re-enter a past-cutoff date without a full correction request
Issued By	FDE Cell issues a single-use grant for one school + one date
Usage	Grant is consumed the moment Hol submits; cannot be used twice
Audit	Who issued, who used, when, and what changed — fully logged
Revoke	FDE Cell can revoke an unused grant before it is consumed
Who Uses	FDE Cell (issue / revoke), Hol (use grant to re-submit)

Group C — Reporting & Analytics (Modules 12–13)

Module 12 — Reports & Analytics Dashboard

Purpose	Multi-dimensional reporting for FDE Cell, AEO, and Director roles
Master Report	All schools × all classes × all days; exportable as Excel or PDF
Sector Report	Admission totals broken down by each of the 7 sectors
Vacancy Report	Available seats vs. enrolled vs. admitted per class and school
Gender Analytics	Male/Female admission split across all schools and sectors
OOSC Report	Out-of-School Children and Parho Pakistan student tracking
Dashboard	KPI cards with charts, sector comparisons, and daily trends
Scope	FDE = all schools; AEO = assigned sector only; Director = all schools (read-only)
Export	All reports exportable as PDF or Excel with one click

Module 13 — Audit Trail

Purpose	Permanent, tamper-evident log of all critical system actions
Captures	Login/logout, corrections, overrides, grants, referral actions, transfers
Record	User, action type, timestamp, old values, new values, institution
Search	Filterable by user, action type, date range, and institution
Export	Downloadable as Excel for external audit or compliance review
Who Uses	FDE Cell (view and export)

Group D — Administration & Configuration (Modules 14–24)

Module 14 — User Management

Purpose	Create, edit, activate, and deactivate portal user accounts
Roles	Assign HoI, AEO, FDE Cell, or Director role to each user
Hol Link	Each HoI account linked to their specific school (EMIS code)
AEO Assign	AEO accounts assigned to one or more sectors
Pre-Seeded	432 HoI accounts automatically created from official Excel data
Who Uses	FDE Cell (admin)

Module 15 — School (Institution) Management

Purpose	Maintain the master directory of all 432 FDE institutions
Fields	Name, EMIS code, type (Primary / Middle / High / Higher Secondary)
Hierarchy	Assigned to Union Council and Sector
Flags	ECE available, Evening classes, Matric Tech, Cambridge curriculum
Status	Schools can be activated / deactivated without deleting records
Who Uses	FDE Cell (admin)

Module 16 — Room Allocations

Purpose	Track classroom allocations per school (class, section, capacity)
New Rooms	New construction rooms tracked separately with allocation status
Export	Generate PDF summary of room allocations per school
Who Uses	HoI (enter own school), FDE Cell (view all schools)

Module 17 — UC Control Rooms

Purpose	View and manage Union Council-level control room assignments
Export	PDF summary of all UC control room details
Who Uses	All roles (view), FDE Cell (manage)

Module 18 — Model Colleges & Ex-FG Colleges

Purpose	Separate directory for model colleges and ex-federal government colleges
Profiles	Each college has a full profile page (public + internal view)
Export	Exportable as PDF list
Who Uses	All roles (view)

Module 19 — Merit Lists

Purpose	Upload and manage admission merit lists per school
----------------	--

Upload	Hol uploads PDF or Excel merit list file for the current academic year
Access	FDE Cell can view merit lists from all schools
Public	Merit lists are accessible on the public portal (no login required)
Who Uses	Hol (upload), FDE Cell (view all), Public (view)

Module 20 — Notifications

Purpose	In-app reminder system for Hol daily admission submissions
Trigger	Auto-generated each day for schools that have not yet submitted
Actions	Mark as read, mark all as read, or delete
Display	Bell icon in the sidebar navigation shows unread count
Who Uses	Hol

Module 21 — AI Report Studio

Purpose	AI-powered narrative reports and insights from admission data
Technology	Integrated with Anthropic Claude API
Capability	Generate custom analytical reports, identify trends, sector comparisons
Interface	Conversational AI studio UI for flexible report generation
Who Uses	FDE Cell (advanced feature)

Module 22 — Theme & Branding Customizer

Purpose	Customize the visual appearance of the portal
Options	Primary colour, accent colour, logo upload, favicon upload
Reset	One-click reset to default FDE theme
Who Uses	FDE Cell

Module 23 — Portal & Academic Year Settings

Purpose	Configure system-wide settings for the admission cycle
Period	Set admission start date and end date for the academic year
Cutoff	Configure daily submission cutoff time (default 11:59 PM PKT)
Public Portal	Set public portal title, introduction text, and footer content
Who Uses	FDE Cell

Module 24 — System Reset

Purpose	Clear all admission data to start a fresh academic year cycle
Safety	Requires typed confirmation before execution
Scope	Resets admission records; preserves school and user master data
Who Uses	FDE Cell (restricted — danger zone)

Group E — Public Access (Module 25)

Module 25 — Public Portal (No Login Required)

Purpose	Public-facing school information portal accessible by parents and students
Merit Lists	Published merit lists viewable without logging in
School Info	School profiles: name, type, sector, contact, classes offered
Access	No registration or login required
URL	/portal and /portal/merit-lists (public routes)

4. User Dashboards

4.1 Head of Institution (Hol) Dashboard

The Hol dashboard is the primary data-entry interface. It is focused on the current school day and guides the Hol through their daily tasks.

What the Hol Sees	Quick Action Buttons
✓ Today's admission status (submitted / not yet submitted) • Total admitted today (live counter per class) • Available seats remaining per class • Pending incoming referrals count • Pending incoming transfers count • Unread notification count (bell icon) • Last submission timestamp	☐ Enter Daily Admissions ☐ View Admission Report ☐ Manage Transfers ☐ View Referrals ☐ Request Correction ☐ Upload Merit List ☐ Room Allocations

4.2 Area Education Officer (AEO) Dashboard

The AEO dashboard provides sector-level oversight. All data is scoped to the AEO's assigned sector(s). The AEO cannot enter or modify any data.

Metric / Widget	Description
Total Schools in Sector	Count of active schools under this AEO's sector
Submitted Today	Schools that have submitted admissions today vs. not yet submitted
Today's Sector Total	Aggregate admissions across all sector schools for today
Cumulative Total	Running total of all admissions in the academic year
Gender Split	Male vs. Female admissions (chart)
OOSC Count	Out-of-School Children admitted in this sector
Monitoring Status	Test/Merit/Doc pipeline status for sector schools
Daily Trend Chart	Line chart: admissions per day over the past 30 days
School-Wise Table	Individual school rows with today's count + status badge

4.3 FDE Cell Dashboard

The FDE Cell dashboard is the command centre for portal administrators. It shows system-wide KPIs and highlights pending actions requiring FDE attention.

Section	Contents
KPI Strip (Top)	Today: Regular admissions, OOSC, P2P, Matric Tech totals
Submission Status	Schools submitted today (green) vs. pending (amber) — clickable list
Cumulative Totals	Academic year running totals across all 432 schools
Sector Breakdown	Table: each sector's school count, today's admissions, cumulative

Pending Corrections	Count of correction requests awaiting FDE review
Active Edit Grants	Count of unused edit grants currently issued
Pending Transfers	Cross-sector transfers awaiting FDE approval
Monitoring Pipeline	Count of records in each stage (test / merit / doc / finalized)
Analytics Charts	Bar chart by sector, line chart daily trend, gender donut chart

4.4 Director (DG / Secretary) Dashboard

The Director dashboard provides a high-level executive view of the entire admission system. It is read-only with no data entry or override capability.

Section	Contents
Executive KPI Cards	Total schools, enrolled students, admitted this year, OOSC, P2P
Sector Performance	Comparison table of all 7 sectors: schools, admissions, progress %
Gender Analytics	System-wide male/female split with trend chart
Monitoring Pipeline	Summary of test → merit → doc → finalized counts
Top Performing Sectors	Ranked list of sectors by admission volume
Submission Compliance	% of schools submitting on time each day (rolling 30 days)
OOSC & P2P Trend	Monthly trend of out-of-school children and Parho Pakistan

5. Key Workflows

5.1 Daily Admission Workflow

Hol Logs In	Opens Daily Admissions	Enters Class Counts	Capacity Check	Submit Before Cutoff	Auto-Verified	Monitoring Created
-------------	------------------------	---------------------	----------------	----------------------	---------------	--------------------

If submitted after the daily cutoff, the Hol must wait for FDE Cell to issue an Edit Grant. Once the grant is consumed, the record is re-verified and monitoring updated.

5.2 Referral Workflow

FDE Creates Referral	Assigns to School	Hol Reviews	Accept or Reject	Test Result Updated	Admission Decision	Case Closed
----------------------	-------------------	-------------	------------------	---------------------	--------------------	-------------

On acceptance, the referral automatically increments today's daily admission count for the selected class. If rejected, FDE may re-refer to a different school.

5.3 Student Transfer Workflow

Hol Initiates	Pending	Receiving Hol Acts	[Cross-Sector: FDE Approves]	Accepted / Rejected	Enrollments Auto-Adjusted
---------------	---------	--------------------	------------------------------	---------------------	---------------------------

Cross-sector transfers (e.g., from Sihala sector to Urban-I sector) require explicit FDE Cell approval before the receiving school can accept.

5.4 Correction Workflow

Hol Requests Correction	Old Values Snapshotted	FDE Reviews	Approved or Rejected	If Approved: Record Updated	Audit Logged
-------------------------	------------------------	-------------	----------------------	-----------------------------	--------------

5.5 Admission Monitoring Workflow

Admission Verified	Test Phase	Merit Phase	Document Phase	All Complete	Finalized
--------------------	------------	-------------	----------------	--------------	-----------

Each stage is independently tracked and locked once completed. FDE Cell can override any stage with a mandatory justification reason — all overrides are audit-logged.

6. Security & Data Integrity

Security Control	Implementation
Role-Based Access	4 roles, 106 granular permissions (Spatie Laravel-Permission v7)
Login Throttling	Max 5 login attempts per minute per IP — lockout prevents brute force
Session Security	Server-side sessions (database driver), CSRF tokens on all forms
Data Scoping	Hol: own school only; AEO: assigned sector only; neither can see other data
Audit Trail	All corrections, overrides, grants, and logins permanently logged
Admission Cutoff	No late entries accepted without an FDE-issued Edit Grant (single-use)
Capacity Enforcement	Hard block: system refuses submissions that would exceed authorized seats
Password Security	bcrypt hashing (cost 12); password reset via time-limited email token
HTTPS	SSL/TLS via Let's Encrypt Certbot (configured in Nginx deployment)
Soft Deletes	Users and institutions are deactivated, never permanently deleted

7. System Statistics & Scope

Metric	Value
Total Schools (Institutions)	432
Sectors	7 (Model Colleges, EX-FG Colleges, Urban-I, Urban-II, Bhara Kau, Sihala, Nilore, Tarnol)
Union Councils	Multiple (organised by sector)
Hol Accounts Pre-Seeded	432 (from official FDE Excel data)
User Roles	4 (Hol, AEO, FDE Cell, Director)
Permissions	106 individual permissions
System Modules	25
Database Tables	33+
Database Migrations	48
Classes Tracked	Nursery, Prep, Class I through Class XII (+ ECE, Matric Tech)
Admission Categories	Regular, OOSC (Out-of-School), P2G (Private to Government), Matric Tech
Shifts Tracked	Morning and Evening (boys/girls separately)
Export Formats	PDF and Excel (all major reports)
Academic Year	2026-27
AI Integration	Anthropic Claude API (Report Studio)
Deployment OS	Ubuntu 22.04 LTS / Debian 12 (Linux) or Windows (Laragon)

8. Contacts & Support

Role / Contact	Details
Portal Administrator (FDE Cell)	Login: admin@fde.gov.pk First-login password: Admin@1234
HoI Default Password	Test@1234 (must be changed after first login)
Training Video	Available on the login page — watch before first use
Technical Support	FDE Information Technology Cell
Password Reset	Use Forgot Password link on login page
